**Product price:**

\$2.80 tax included

**Product short description:**

Small, simple, and colorful. These silicone ceiling canopies are perfect from bringing bold color into spaces. And we have matching silicone light bulbs socket covers available for every canopy! These canopies are durable, soft and nice-to-touch. The light and almost indestructible material makes them appreciated by designers and decorators alike.

\*Important Note - These canopies are only 3.27 inches in diameter. They will NOT COVER a standard junction box. These should be used only for very small junction boxes or when there is no junction box at all. Also note that these require that you provide your own hook to mount the canopy to a wall or ceiling.

This silicone ceiling canopy kit is for you if:

- you're looking to make a single pendant light - with one light bulb
- you love POP style
- you want a fast and easy-to-mount solution (no need to drill the ceiling!)

And again, be sure to match this with one of our silicone light bulb socket covers and some of our cloth covered wire to create your perfect pendant light.

**Product description:**
