Product short description:

The Dish Lampshade from our Materia Collection is a simple yet beautiful way to enhance your space. This pendant lamp shade is one of our favorites and can be used universally to complement almost any style and fit seamlessly into any space.

From pendants hanging over kitchen bars to restaurant lighting, these fixtures brighten rooms across the world. One of our favorite applications is pairing these shades with our double ferrule Fermaluce wall sconce and dipped light bulbs. Together, they create a stunning combination that provides perfect mood lighting.

Each of these ceramic pieces is unique and crafted by skilled artisans just outside of Venice, Italy. Every lampshade is hand-painted and kiln-fired to achieve a gorgeous finish. The interior of each shade is white-polished to amplify and evenly disperse light. Please note that because each piece is handmade, variations in color, finish, and texture will occur. This is not a defect. Additionally, for the colored versions of these shades, the paint is designed to chip and flake slightly, following the traditional style of southern Italian ceramics. This is an intentional design feature, not a flaw.

Pair this shade with a variety of lamp parts, cloth-covered wires, and unique light bulbs. The Dish pendant light shade works beautifully with many different bulb styles. These shades are designed for E26 double ferrule or UNO-style light bulb sockets. To attach the shade to your pendant or sconce, simply remove the light bulb and the bottom ferrule (ring) from the socket, slide on the lamp shade, tighten the ferrule below the shade, and screw the bulb back into place. These shades will not work with sockets that do not have ferrules or rings.

Attention! No other lamp parts are included with this product. This listing is for the pendant lamp shade only.

Product description:

Dish Lampshade - The Materia Collection - Technical Specs:
