**Product short description:**

Looking for the perfect dome-shaped pendant light shade with a touch of retro-modern style? The Foldi Shade is exactly what you need! These shades bring style, simplicity, and charm to any pendant light setup.

Foldi Shades are **Fair Trade Certified** and crafted by hand in Thailand. What does this mean? It means each shade is handmade by skilled artisans working in their homes, where they are treated ethically and paid a fair, living wage. These are **NOT** mass-produced factory items. When you purchase a Foldi Shade, you're not just buying a beautiful dome light shade — you're directly supporting families and preserving their traditional way of life.

Say goodbye to DIY disasters like messy, glue-soaked yarn wrapped around balloons. With the Foldi Shade, the hard work is already done for you. Just "**press the easy button**" and enjoy a quick, simple assembly process.

Everything you need comes in the box. In just a few minutes, you'll unbox, unfold, spray the shade with water, and let it set to harden. All you need is water for the included spray bottle and a bit of air to blow up the provided balloon that helps the shade maintain its shape.

The texture of this dome-shaped pendant shade features small micro-holes, allowing light to filter through and create a soft, unique glow. Hang several together for a dramatic effect, or pair one with our plug-in pendant lights and "V" swag hooks to create a stylish light fixture wherever you need it.

**Each box includes:**

- One shade
- One spray bottle
- Two balloons (a backup, just in case)
- A mounting piece for use with an E26 bulb

The small Foldi Shade has a diameter of 10 inches.

**Attention!** Light bulb and socket are **NOT** included.

**Note:** This shade is **ONLY** for use with LED bulbs. It works best with A19, ST21, or similar smaller LED bulbs. For a soft "glowing" effect, we recommend white-finished bulbs with a 4000K color temperature. However, any standard A19 LED bulb will work beautifully.
