Product short description:

Looking for the perfect small round lamp shade with retro cool hipness? The Foldi Shade is it! **Recently named the best small round/sphere shaped lamp shade in the world** by a leading design publication, these lamp shades are everything you want in a pendant light shade.

Foldi Shades are **Fair Trade Certified** and artisan made in Thailand. What does that mean? It means that these are handmade by craftspeople in their homes who are ethically treated and guaranteed a fair wage for their work. These are NOT mass produced in a factory. With every purchase you make of a Foldi Shade you aren't just buying a beautiful pendant lamp shade, you're supporting a family and their traditional lifestyle.

With Foldi Shades you can forget about spending hours trying to make your own lamp shade by wrapping glue-soaked yarn around a ballon only to hope it doesn't fall apart. The hard work has already been done for you. All you have to do is "**press the easy button**" and order our simple to do it yourself lamp shade. It comes with everything you need to in the box. It takes only minutes to unbox, unfold, and spray it down with water to let it harden and set. All you need to supply is water (for the included spray bottle) and your own breath to blow up the included balloon that makes sure it holds its shape.

The texture of this small round sphere shaped pendant light shade is perforated with small micro-holes that let's the light pass through and gives an original and gentle lighting effect. Hang in multiples to create a dramatic look. Or combine it with one of our plugin pendant lights and "V" swag hooks to instantly set up a beautiful light fixture anywhere you want.

The box includes one shade, spray bottle, two balloons (just in case one bursts), and a mounting piece to hang when used with an E26 bulb.

The small round Foldi Shade is 10" in diameter.

Attention! Light bulb and Socket NOT included.

****This shade is ONLY to be used with LED Bulbs.**** The round shade should be used with A19, ST21 or smaller size diameter LED bulbs. For a "glowing" affect we recommend white finished bulbs with a 4000K color temperature. However any A19 LED bulb can be used.

Product description:
