Product price:

\$8.70 tax included

Product short description:

Our Rounded Top metal light bulb socket kits are a little more whimsical than our classic flat top socket kits. Just like the flat tops, these too make a great light bulb socket kit for those of you looking build your own DIY pendant light or plugin pendant light at home.

Note that ALL of our rounded metal light socket covers come as kits. This means that they INCLUDE a grounded E26 UL Listed light socket and a strain relief! (Compare to others who sell these parts separately.) We make sure that you have all the lamp parts and light supplies you need to create the perfect pendant light or plugin pendant light.

All of our Rounded Top light bulb socket kits to come standard with a Conical strain relief cable clamp cord grips. And if you like, you can also add on a cylindrical strain relief from our website by going to Lamp Parts and Shades > Accessories > Strain Reliefs. These sockets work great with our pendant light cloth covered wire color cord.

UL Listed: E190302

Be sure to check out our tutorial videos to learn how to wire up this Rounded Top metal light bulb socket. It's wired exactly the same as our flat top sockets.

Product description:

Dimensions:

Diameter: 1 -3/4 inches (44 mm)

Height: 2 - 7/16 inches (62 mm)

Technical specifications Conical strain relief cable clamp

Height: 1 - 11/16 inch (43 mm)

Diameter: 11/32 inch (14.8 mm)

UL Listed: E190302

Note that the interior light bulb socket has a built-in locking safety device that does not allow you to unscrew it once assembled. (This is to protect you from electric shock.)

We ship all our light sockets

not fully assembled and twisted closed

so that the built-in locking safety mechanism is not "locked" when you receive it.

If the safety device does somehow become locked you can unlock this security system, located inside the socket on the side, with a small screwdriver. Please see our tutorial page for videos on how to unlock these light bulb sockets. And If you attempt to unlock the socket you must have the power

Disconnected

to the socket before inserting anything into the socket!
