Product short description:

Bring the outdoors into your lighting with our real bark covered log light bulb socket kits. Each Bark covered log light bulb socket kit is made from a single small log of real wood, making each piece one of a kind. It's unique and 100% Made in Italy.

With a height of 4 - 3/8 inches the Regular Log bark covered light socket cover is a simple yet perfect lighting solution for those who want to create beautiful and natural pendant lights for your cabin or rustic style setting. (And if you watch enough DIY television you've probably seen these on a few of your favorite shows.)

Because of each bark covered log light bulb socket is unique, the width varies between 2 inches and 3 - 3/16 inches. The hole, at 13/16 inch in diameter, allows for use with any of our pendant lighting cables and even our XL nautical real rope cords, so you will have the option of creating a pendant light with a striking natural look.

The Log Bark E26 socket kit comes complete with a phenolic bakelite socket and cable retainer strain relief lamp part.

Be sure to check out our tutorial videos to learn how to wire up this Log light bulb socket kit.

UL Listed: E190302

Plastic cable clamp.

UL Listed: E190302

Note that the interior light bulb socket has a built-in locking safety device that does not allow you to unscrew it once assembled. (This is to protect you from electric shock.)

We ship all our light sockets

not fully assembled and twisted closed

so that the built-in locking safety mechanism is not "locked" when you receive it. If the safety device does somehow become locked you can unlock this security system, located inside the socket on the side, with a small screwdriver. Please see our tutorial page for videos on how to unlock these light bulb sockets. And If you attempt to unlock the socket you must have the power

Disconnected

to the socket before inserting anything into the socket!
