**Product title:**

Double ferrule black thermoplastic E26 lamp holder kit for lampshade and String Lights

**Product attributes:**

**Product image:**

**Product price:**

\$6.60 tax included

**Product short description:**

The string lights are the configurable solution made by Creative-Cables to illuminate outdoor environments such as gardens, gazebos, pergolas and porches.

This black thermoplastic E26 threaded lamp holder is designed to allow you to easily and autonomously compose your string lights, giving you the possibility to insert a lampshade and make your spaces even more special.

The threaded lamp holder can be installed on the rectangular string light cable at any point, so you can complete your string light or add a lampshade to your Filé system: choose from the many E26 LED bulbs in our assortment the ones you prefer to create the right atmosphere and complete your installation!

**Product description:**

E26 threaded double ferrule black thermoplastic lamp holder, ideal for autonomously composing a string light; simply fasten it to the cable at the desired point.
