Product title:

Kit Cablò, support in recycled plastic to create lampshades

Product attributes:

Finish: Black, Multicolor

Product image:

Product price:

\$7.70 tax included

Product short description:

Created by Fabrizio Alessio, a designer from Turin, Cablò is a support in recycled plastic that revolutionizes your suspension lamps in a simple and cost-effective way by turning itself into a lampshade without need of a tailor-made lamp holder.

Using Cablò has never been easier. Open the two plastic sections, then insert any original 2x0,75 or 3x0,75 Creative-Cables fabric cable (that is at least 50 cm long) in the designated slots. Thanks to the pressure cable-clamp built-in the eyelet you will be able to attach it to any cable, right above the lamp holder.

Pick out your Cablò kit, which comes in a black or multicoloured version and with light traces of its past life. Use it to create a fully customisable lamp. How? By inserting the cables with different combinations to obtain a variety of shapes and weaves. And if you get bored, you can switch up Cablò as many times as you like, adapting it to any room (or any mood!). For a friendly and fun lampshade, both for you and for the environment.

Product description:
