Product price:

\$74.30 tax included

Product short description:

A lamp of minimal elegance and simple shapes, ideal for those looking for a furnishing element that is both sober and elegant, but also practical and functional. The conical base, handcrafted in Italy with alder wood, is worked by master craftsmen to enhance the natural beauty of the grain, giving the product great appeal. Furthermore, the wood is untreated on the surface: it can therefore be used as it is, or painted as desired.

Enriched by the iconic textile cable signed Creative Cables, also made in Italy, this lamp discreetly fits into any setting. Available with the cable in different shades, it is equipped with a matte white globe-shaped bulb, with warm and enveloping light.

But there's more: this lamp hides a unique feature. When necessary, simply unscrew the bulb to easily detach it from the wooden base and hang it where it is most needed. Whether wrapped around the bookcase in the study or suspended on the coat rack at the entrance, it offers additional lighting exactly when and where it is needed.

Product description:
