Product short description:

Discover **Unbreak-a-Ball**, the innovative lampshade designed to protect your bulb with style and functionality. Made of **impact-resistant plastic (LDPE)**, this 5.3-inch diameter ball easily screws onto the E26 ferrule of any threaded or semi-threaded socket.

The opposite side has a strategic opening that allows bulbs to be inserted. The sphere's cap, made of polycarbonate, features **decorative holes** that enable quick opening and closing for bulb replacement and help prevent condensation buildup, ideal for outdoor use when paired with the [EIVA](#) or [Lumet](#) systems.

The name Unbreak-a-Ball says it all: this shade effectively protects the bulb from shocks and drops, making it perfect for any type of lamp, indoors or outdoors, such as:

- [Table lamps](#) or plug-in lamps with a colorful cable, perfect for a nursery.
- [EIVA Suspensions](#), for extra weather resistance.
- [Cables](#), to prevent damage from accidental drops.

Whether you're decorating an indoor space with a safe solution or adding style and functionality to an outdoor lamp, Unbreak-a-Ball is the lampshade that combines aesthetics, protection, and practicality. Create your own unique lighting design with Unbreak-a-Ball!

Product description:
